LETTER OF TRANSMITTAL

TO: ALL HOLDERS OF SA226 SERIES ILLUSTRATED PARTS CATALOG

REVISION 105, DATED NOVEMBER 01, 2016

The following "Summary of Changes" have been performed to update the SA226 Series IPC-

Summary of Changes:

1. Revised data and made editorial corrections in the INTRO, Alpha and Numeric Indices, and Chapters 11, 21, 24, 25, 27, 28, 29, 30, 31, 32, 33, 34, 52, 53, 54, 55, 56, 57, 61, 73, 76, 78, 79 and 82.
2. Title Page and Record of Temporary Revisions page(s) have been REVISED. All Temporary Revision(s) (TR) prior to R105 have been incorporated. Remove copies of TRs and TR Letters from any operator maintained addendum manual or file(s).
3. The Record of Revisions page has been REVISED to show the IPC is current thru Rev. 105.
4. Refer to each chapter's **List of Effective Pages** to determine which pages have been revised.

NOTE: Even though the revision date is NOV 01/16, updated information was continuously added right up until 2018 distribution.

TO: ALL HOLDERS OF SA226 SERIES ILLUSTRATED PARTS CATALOG

REVISION 105, DATED NOVEMBER 01, 2016

The following "Summary of Changes" have been performed to update the SA226 Series IPC-

Summary of Changes:

1. Revised data and made editorial corrections in the INTRO, Alpha and Numeric Indices, and Chapters 11, 21, 24, 25, 27, 28, 29, 30, 31, 32, 33, 34, 52, 53, 54, 55, 56, 57, 61, 73, 76, 78, 79 and 82.
2. Title Page and Record of Temporary Revisions page(s) have been REVISED. All Temporary Revision(s) (TR) prior to R105 have been incorporated. Remove copies of TRs and TR Letters from any operator maintained addendum manual or file(s).
3. The Record of Revisions page has been REVISED to show the IPC is current thru Rev. 105.
4. Refer to each chapter's **List of Effective Pages** to determine which pages have been revised.

NOTE: Even though the revision date is NOV 01/16, updated information was continuously added right up until 2018 distribution.

INTRODUCTION

1. GENERAL INFORMATION

A. This is an M7 Aerospace SA226 T, AT, TC Illustrated Parts Catalog. Its purpose is to permit the identification and ordering of spare parts for the maintenance of aircraft. Each chapter contains a comprehensive List of Effective Pages and Table of Contents. Close scrutiny of the Table of Content's EFFECTIVITY columns will direct you to the correct parts listing for your aircraft. Through Revision 94, October 15/99, this same EFFECTIVITY block has been provided in the lower left corner of every catalog page; however, the lower left corner "EFFECTIVITY block" was eliminated with Revision 95 (See paragraph 3.A.).

(1) Originating with Revision 87, the catalog will be presented in two distinct formats. The new format will incorporate larger ATA numbers on the bottom of the page as well as improved art. Change bars will be used in the Table of Contents and the List of Effective Pages. The old format will remain unchanged.

B. This catalog is organized under three levels as defined by Air Transport Association Specification Number 100 (ATA - 100). The levels are: (1) Chapter/System, (2) Section/Sub-System, and (3) Sub-Section/Unit.

C. Each chapter is assigned a code which appears on the lower right of each page. The code consists of three pairs of numbers, such as 21-60-30 or 61-00-20. The three pairs of numbers indicate the Chapter/System, Section/Sub-System, and Sub-Section/Unit where each assembly is located.

D. The catalog lists all standard replaceable parts in the aircraft. Each illustration is accompanied by assembly or component parts data in the adjacent text. Component parts not listed separately are items which are an integral part of assemblies and which would be impractical to stock other than in complete assemblies. Common hardware used in tube and wire routing may not be listed, as such items are seldom replaced or are readily available at aircraft maintenance stations. Parts no longer in production, but for which preferred substitutes or superseding parts exist, have the notation, "Replace with/Replaced by (mandatory), Replaces or REPL PN/REPL PN is, Alt PN," etc., in the NOMENCLATURE column along with a reference to the alternate or replacement part. In some cases, the abbreviation "HR" (2.F(3)) may be displayed in the "Units Per Assy" column to signify the past to present usage, but M7 no longer offers the old PN and the ***preferred (***REPL PN) is the only one that can be ordered. NOTE: "Replace with/Replaced by" are interchangeable terms and signify mandatory replacements. In this case, the "HR" only denotes past service, but once the old PN is removed, it must be replaced with the new part number.

E. Reference should be made to the SA226 T, AT, TC Wiring Manual for electrical items not found in this catalog, i.e., cables, connectors, plugs, backshells, switches, circuit breakers, etc. Additionally, although some electrical items are found in this catalog, the Wiring Manual takes precedence over the Illustrated Parts Catalog for electrical parts.

F. To assist in locating parts on the aircraft, an illustration (locator) of the specific area of the aircraft appears on each illustration. The location of all assemblies and component parts on all SA226 T, AT, TC aircraft will be identified in this manner.

G. Illustrations used in this catalog are assigned a serial number. The serial number may appear in a small box (e.g. 6I2130601) within the face of the illustration. The serial number is for M7 Aerospace Technical Publications use only and has no significance to the end user of this IPC.

H. A part supplied by other than the prime manufacturer, may have a Code (identifying the Vendor) assigned. This five-character alphanumeric code in the Nomenclature column is preceded by the letter V. The Vendor List is provided in the INTRO Section of this catalog to assist in cross-referencing the code to the manufacturer. The Vendor List is divided/sorted into two sections, alpha and numeric.

2. HOW TO USE THIS CATALOG

A. If you want to locate a part number for the landing gear, begin by looking in the Chapter 32 Landing Gear Table of Contents to find the assembly location.

B. Look in the EFFECTIVITY column to see which assembly was installed on your aircraft. Turn to the section of Chapter 32 called for, and locate the part on the illustration. Illustrations are on left pages and parts listings are on right and left pages following the illustration. Find the item number on the illustration, then find the same item number on the parts listing. By cross referencing the EFFECTIVITY column with the parts listing, you can locate the part(s) installed/required on your airplane.

C. The following is a brief explanation of the columns used in the parts listings:

(1) The FIGURE and ITEM NUMBER column displays the illustration figure number only at the top of each parts listing page. The item numbers are keyed to those in the accompanying illustration. A dash (–) in this column indicates the part is not illustrated. Item numbers should not be used in identifying parts for purchasing purposes.

(2) The PART NUMBER column identifies the item by its assembly or component part number. This part number is to be used in ordering parts. Parts manufactured or modified by M7 Aerospace are; prefixed with 26-, 27-, 27K, 32-, 35-, 40- or 50-, followed by a series of alphanumeric characters. Parts which are vendor manufactured are listed by vendor part number, if an M7 Aerospace part number has not been assigned.

NOTE: For all installations, assemblies, and details: The last section of the Part Number (after the dash, also known as "the dash number") may be comprised of up to 3 digits with leading zeroes as inventory system digit placeholders. As an example, -1 may be represented as -001. Leading zeroes do not indicate a difference in configuration.

NOTE: There are situations when the part number of a part you receive does not exactly match the part number you ordered. Dash numbers may be prefixed with an 8 or a 9 indicating the part requires trimming, drilling, assembly to another part, or a specific process to facilitate installation. These are authorized replacement parts for your aircraft. For example; you order a 27-51009-011, Trunnion Bushing, and the part you receive is a 27-51009-8011. The dash (-)8011 Bushing requires four (4) holes to be drilled for installation. The part is a 27-51009-011 after it is installed on your aircraft, and must be reidentified as 27-51009-011.

NOTE: Similarly, a part number you receive may have an alpha character following the part number you ordered (for example, 27-31130-039A or R or P, etc.). This alpha character indicates the part received requires trimming, drilling, etc., upon installation. The alpha character does not denote any other change to the basic material, fit, form, or function of the part number ordered. Upon installation, the replacement part number, with alpha character, becomes the original (part being replaced) part number and must be re-identified as such (Ex: 27-31130-039).

(3) The NOMENCLATURE column shows assembly analysis by partition into assembly number, component parts numbers, and attaching parts numbers.

(a) Attaching hardware or parts, under the heading - Attaching Parts -, are required for the installation of one unit in the assembly. Structural rivets are not tabulated, since they are often replaced with larger sizes.

(b) Parts of the same description, differing only as left and right hand units, are listed once and designated as LH,RH in the NOMENCLATURE column. Parts of the same description which are peculiar to either the left or right are listed separately.

(c) Non-illustrated component parts (preceded by a dash [–]) are listed by order within the assembly or component.

D. Abbreviations used in the nomenclature column are as follows:

Assy.	- assembly	LE	- leading edge	REPL PN/REPL PN is - Replacement Part Number (Preferred Alternate)	
Alt PN	- or Alternate (Optional) Part Number	LH	- left hand		
		LWR	- lower		
B.L.	- butt line	N.S.	- nacelle station	RH	- right hand
C/O	- customer option	OPP	- opposite	TE	- trailing edge
F.S.	- fuselage station	OUTBD	- outboard	UPR	- upper
FWD	- forward	PN	- part number	W.L.	- water line
INBD	- inboard	P/N	- part number	W.S.	- wing station

E. Using The EFFECTIVITY Column:

(1) The EFFECTIVITY column is used to designate specific serial number effectivities within the effectivity range of each figure. The serial number effectivities are also shown in the lower left hand corner of each page for pages incorporated prior to Revision 95.

(2) The three EFFECTIVITY columns are used to designate applicable model series for each part. A number or range of numbers indicates applicability. If the column is blank it indicates non-applicability.

F. UNITS PER ASSEMBLY Column:

(1) Each entry in the UNITS PER ASSEMBLY column represents the total number of that part or assembly used in or for, one unit of the next assembly. Therefore, the UNITS PER ASSEMBLY column shows the number of items required to complete or attach one unit to the next higher assembly of which it is a component or attaching part.

(2) RF in this column indicates the item is for reference only. It is possible that the same item may be called out in another location (figure) with a quantity elsewhere in the IPC.

(3) **HR** in this column indicates the item is listed for clarity as a **H**istorical **R**eference only. This part number is still acceptable for service, but is no longer offered for purchase by M7 Aerospace because there is a preferred alternate available. Use the preferred "Alt PN", or "Replaces" or "REPL PN/REPL PN is" part number when ordering. NOTE: "Replace with/Replaced by" are interchangeable terms and signify mandatory replacements. In this case, the "HR" only denotes past service, but once the old PN is removed, it must be replaced with the new part number.

(4) **AR** in this column indicates the quantity is **A**s **R**equired.

3. REVISIONS

A. Revisions to this catalog will be made by replacement pages and issued in accordance with ATA-100 specifications. The revisions will be numbered consecutively and should be inserted in accordance with the Letter of Transmittal issued for each revision and List of Effective Pages issued for each chapter. Parts Listing, text changes will be depicted by the letter "R" along the left margin of the page, located adjacent to and in alignment with the line(s) being added or changed. Changes to the Introduction, List of Effective Pages, Table of Contents, top subject line of IPC text page, illustration/figure itself or figure title text change will be depicted by a black vertical line (change bar) in the left margin, which is located adjacent to, and in alignment with areas of specific changes on these pages. A change bar in the lower right margin located adjacent to, and in alignment with the figure number, page number and date indicates that the text is unchanged, but the material was relocated (shifted) to or from a different page. Effective with Revision 95, change bars were no longer provided when text material relocated to a different page or when an illustration/figure itself or figure title was changed; however, these change bars are being reinstated with Revision 104, APR 01/15. Also, effective with Revision 95, the aircraft Effectivity block is no longer provided in the lower left corner of each page and that remains in effect. This information is contained in the "Effectivity" columns on the right side of each text page. Incorporation of a Revision will be recorded on the Record of Revisions sheet provided at the front of the catalog.

4. HOW TO ORDER PARTS

A. Always specify the Part Number, Nomenclature, and Quantity of parts desired. Be sure to include aircraft type (e.g., SA226 T, AT, TC) and serial number for which parts are intended. Provide complete shipping address, method, and carrier information.

B. For detailed ordering instructions, pricing, and liabilities information, refer to your M7 Aerospace Spare Parts Price Catalog.

OPERATING LIMITATIONS

THIS AIRPLANE MUST BE OPERATED AS A NORMAL CATEGORY AIRPLANE IN COMPLIANCE WITH THE OPERATING LIMITATIONS STATED IN THE FORM OF PLACARDS, MARKINGS, AND MANUALS. NO ACROBATIC MANEUVERS, INCLUDING SPINS, APPROVED.

MAXIMUM OPERATING SPEED (SEA LEVEL TO 26,000 FT.) V_{MO}.....265 KTS
(DECREASE BY 6 KTS PER 1000 FT. ABOVE 26,000 FT.)
MANEUVERING SPEED.....194 KTS
MINIMUM CONTROL SPEED.....105 KTS
MAXIMUM FLAP EXTENSION SPEED.....FULL FLAP.....153 KTS
1/2 FLAP.....180 KTS
1/4 FLAP.....215 KTS
MAXIMUM LANDING GEAR SPEED.....176 KTS
MAXIMUM LANDING LIGHT EXTENSION SPEED.....150 KTS

APPROVED TYPES OF OPERATION

DAY/NIGHT, VFR/IFR AND ICING CONDITIONS -
SEE AFM FOR REQUIRED EQUIPMENT LIST.

RECOMMENDED SPEEDS

SINGLE ENGINE BEST RATE-OF-CLIMB, S.L.....143 KTS
TWIN ENGINE BEST RATE-OF-CLIMB, S.L.....147 KTS
TWIN ENGINE BEST ANGLE-OF-CLIMB, S.L.....108 KTS
APPROACH SPEED, FLAPS DOWN.....105 KTS
MAXIMUM DEMONSTRATED CROSSWIND.....22 KTS
